

Digital Organizing Playbook

ethical Campaigning & Data Autonomy

I. Reclaiming Data Sovereignty

Do not hand community contacts to tech giants. Host your own databases locally and use open-source CRM systems.

II. Peer-to-Peer Texting Networks

Deploy secure, self-hosted SMS campaigns to mobilize voters without tracking cookies or third-party ads.

III. Open-Source Campaign Tools

Utilize open-source alternatives: Jitsi for video calls, CryptPad for strategy documents, Mastodon/Matrix for comms.

IV. Countering Platform Surveillance

Implement privacy-focused analytics on your websites, avoiding Meta Pixels and Google Analytics entirely.
