

Activist OpSec Checklist

Operational Security for Organizers & Protesters

I. Device Hygiene Checklist

1. Enable full-disk encryption. 2. Disable biometric unlock (face/fingerprint) before protest. 3. Install a privacy screen filter.

II. Secure Communications Protocols

Move teams to Signal. Turn on disappearing messages (e.g. 1 day). Set a registration lock PIN on your Signal account.

III. Protest Safety & Cell Structure

Assign a jail support coordinator. Write emergency contacts on your skin. Share sensitive campaign details on a need-to-know basis.

IV. Counter-Surveillance Basics

Monitor for IMSI catchers (Stingrays) by looking for unexpected cellular network drops. Use encrypted VPNs on public WiFi.
